Environment and Energy Efficiency Policy

13.02.2016

A.V.College of Arts, Science and Commerce acknowledges and takes responsibility for the environmental impact of its activities and is therefore committed to minimize this impact by adhering to a range of sustainable practices and setting targets to make the campus environment friendly by responsible energy, water and waste management as part of an overall environmental strategy.

The Ministry of Human Resource Development has been emphasizing the need for minimizing the adverse institutional impact on the environment and its carbon footprints as Educational institutes are the best agents of change. In connection with this green campus initiatives have been planned to develop and implement tailor made programs with an integrated approach.

Specific objectives

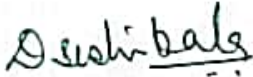

- Reducing the consumption of resources such as water, energy, paper and plastic
- Rain water harvesting
- Recycling of greywater
- Minimise energy and water use by encouraging reuse and recycling
- Minimise energy costs by the use of energy efficient appliances and LED Bulbs.
- Sustainable management of e-waste, solid and hazardous waste
- Use of renewable energy resources such as solar energy
- Making greater use of recycled products and materials, and materials derived from sustainable sources
- Soil and Biodiversity conservation
- Vermicomposting and promotion of natural farming methods.
- To Monitor, evaluate and continually improve its environmental performance
- Ensure that the environmental policy is implemented and supported at all levels
- Our main agenda is to address the challenges of sustainable development at institutional level and implement effective and immediate measures to prevent environmental degradation.

The College will therefore promote the conservation and sustainable use of natural resources, minimize environmental pollution in all its activities and where possible, influence and encourage others to do so.
