

INSTITUTIONAL PRACTICES 202-21

Title of the practice : Voice and views – [VIEW DOCUMENT](#)

Objectives of the practice: Personalized learning happens when students voice their opinions ,a progressive movement that enhances the learning skills of students, a guiding force that helps them to express, share and voice their opinions deliberately in an assertive manner .A.V College Voice and Views is an investment in learning that takes them close to success, which also ignites their passion and promotes determination.

The voice and views started by student council aims at

- Training them to voice their opinions deliberately in an assertive manner.
- Enhance their skills to build confidence that paves way for career advancement.
- Helping them gain command over language and excel in their interviews.

The Context :The institution believes in training the students through a straightforward process to learn effective communication skills .

Plan effectively to hone their skills-verbal & non verbal .

Helping the students not only to develop communication skills but also to emote their feelings in different interpersonal contexts.

Ensures building life skills that evades them from entering into stifling conflicts, and allows them to promote decorum in the work environment.

The Practices: The college has initiated this best practice called “Voice and Views” to help students make the best use of the opportunity given to them.

Students are trained to explore and process information and share their ideas which enables them to consider various viewpoints.

The use of discussion helps the students bring forth their own personal experiences to the forefront more effectively and also with resolutions.

Personalized learning: This is an approach designed to help students benefit by their own contributions. Students learn from others and acquire the prerequisite skills useful for their career.

The platform provided helps them shun their inhibitions and adapt to any professional arena.

Internships: The college is also having a tie up with companies that provide internships and it has initiated to train them into careers that the students have aimed for.

Students are briefed on various careers and the pattern of the interview process by the guest speakers.

Jam session, versant round, technical agility, logical reasoning, pronunciation, vocabulary and analogy are few components that the students receive training in.

Evidence of Success :Most of the students have realized their goals and the means to achieve them.

To the institution’s credit most of the students of UG & PG are well placed in Companies like Wipro, Cognizant, GE ,ADP, Asian Paints,24/7, Google etc.. with good pay packages.

Problems Encountered : Most of the students are unable to shun their inhibitions and learn the traits of extroversion.

Accommodating a large number of students who have different goals, with different areas to be strengthened stands as a challenge for the institution.

Students who come from different backgrounds their self evaluation capacity is still weak.

INSTITUTIONAL PRACTICES

Title of the practice : Health Camp– [VIEW DOCUMENT](#)

Objectives of the practice:

- To help poor get health care free of cost.
- To spread awareness regarding proper hygiene and cleanliness.
- To help the underprivileged and train them to address any health issue that outbreaks.
- Educate and train students to be conscious about the society that they live in.

The Context : The A.V. College health committee has organized an awareness program, a review on general health and threw light on different types of cancers and also educated on the preventive measures .
The committee with the students has paid a visit to the underprivileged society and also briefed women and young girls on how prone they are to gynecological related cancers.
The students were given hands-on experience, when they were asked to make a survey and counsel the people of that social milieu.

The Practices: A.V. College has always believed in serving the society, which is exemplified by the initiative that the health committee has shouldered. The responsibility of giving health related awareness and distributing medicines which were not easily available or which the inhabitants of the underprivileged society could not afford to buy.
To establish the community norms, the health committee in collaboration with the social responsibility committee and youth red cross have arranged for covaxin and covishield first and second doses of vaccination to the community free of cost .this privilege was open for all.
Such camps were held twice.

Evidence of Success : Though initially the students were reluctant ,later they have become more participative and have also learnt the art of dealing with them.
The vaccination health camp has eased the burden of the people around A.V. College as there was a shortage of vaccines by then also they did not have to wait in long queues .

Problems Encountered : Students weren't ready to pay a visit as they feared that they might be more susceptible to any communicable diseases.
Students also lacked self confidence and thought that only after taking a professional training they can go ahead with such approaches.

An awareness program was organized by the Health Committee; a review on general health and awareness on different types of cancers as well as about the preventive measures were discussed.

Speaker for the program was Dr. Aparna Surya Devaraa, Radiologist, Assistant Surgeon of MNJ Cancer Hospital, Hyderabad.

In this program 100 members participated from A.V. College staff as well as some of the colleges (RBVRR, Vanithamahavidyalaya and St. Francis college staff members) through zoom online platform and they were benefited with the knowledge in identifying the preliminary stages of cancer.
